Nama : Reinaldhy Suzeta Purba

NIM : 201402064

Matkul : Enterprise Development Software

Getting Started with SAP HANA Cloud

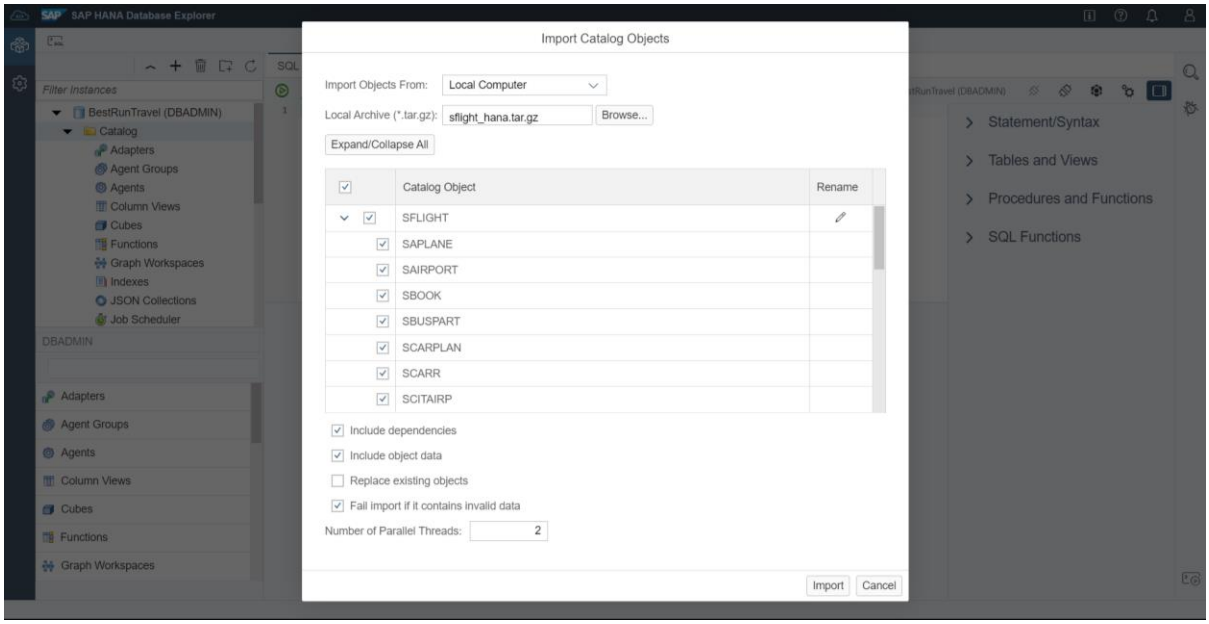
3. Modul 3 : Upload Data to Your Instance

- Importing Sample Data

In this step, users are instructed to follow to GitHub and download the "sflight_hana.tar.gz" file to their local computer.

- Uploading Sample Data

Then, users can access the SAP HANA Database Explorer and select "Import Catalog Objects." On the local computer, users should locate the previously downloaded "sflight_hana.tar.gz" file, select the file and wait for it to be uploaded. After that, Users are advised to check the box at the top of the table to select all catalog objects within the selected file and then click on "Import" to initiate the data import process.



- View Imported Tables

Once completed, u can expand your catalog and click on "Tables" to view all the newly imported tables. The data will be stored in a new schema called "SFLIGHT." Users can select the " SFLIGHT " schema to access the imported " SFLIGHT " table.
